# New TVS Radeon launched in India with Reverse LCD Cluster

01/07/2022 • by Rohit Tonapi

Written by **Rohit Tonapi**

TVS Motor India has announced the launch of the new Radeon. The model will now be available across all TVS dealerships across the country. The new Radeon will be available in 4 variants.

These variants are – Base edition & Dual-Tone Edition Drum with Reverse LCD Cluster, Dual-Tone Edition Drum with Reverse LCD Cluster & ISG/ISS and Dual-Tone Edition Disc with Cluster in a colour selection of Dual Tone Red & Black, Dual Tone Blue & Black apart from base edition colours (Starlight Blue, Metal Black, Royal Purple & Titanium Grey).

The pricing will start at INR 59,925 ex-showroom for the TVS Radeon 110 ES MAG BS6. At the same time, the BS6 DIGI Drum Dual-Tone costs INR 71,966 ex-showroom.

## New TVS Radeon – Highlights

With the new update, the Radeon becomes the first 110cc motorcycle to get a reverse LCD cluster with a real-time mileage indicator (RTMi). Furthermore, it is also the only 110cc motorcycle with a multi-colour reverse LCD cluster. TVS says apart from the RTMi, there are 17 more other useful features. These include a clock, service indicator, top speed & average speed and low battery indicator.

TVS has also equipped the Radeon with its TVS Intelligo. The technology includes the use of an ISG and ISS system. The technology switches off the engine during long idling times. Additionally, it also features TVS Ecothrust Fuel injection, which helps it deliver 15 per cent better mileage. It also enhances the engine's performance and durability.

The bike uses a 109.7cc Dura-Life engine. TVS designed it to offer an optimum combination of power and fuel economy. The motor makes 8.4 PS of power at 7,000 rpm and 8.7 Nm of torque at 5,000 rpm.

The bike also ensures comfort for long-distance riders. For this, it gets the longest seat in the category and a 10-litre fuel tank. Other practical features also include a USB charger.
